

# Standards Announcement

## Project 2007-03 Real-time Operations

**Non-binding Poll Windows Extended Through 8 p.m. Eastern on Wednesday, January 18, 2012**

**BALLOT WINDOWS for Three Standards STILL CLOSE at 8 p.m. Eastern on January 12, 2012**

Three non-binding polls of the VRFs and VSLs associated with the following standards have been extended through 8 p.m. Eastern on Wednesday, January 18, 2012 (previously the window was to have closed Thursday, January 12, 2012):

- TOP-001-2 Coordination of Transmission Operations
- TOP-002-3 Operations Planning
- TOP-003-2 Operational Reliability Data

Due to a technical issue, the non-binding polls were not visible to some ballot pool members, so the non-binding poll windows are being extended to provide all ballot pool members a full 10-day window to cast their opinions on the VRFs and VSLs associated with the three standards.

**PLEASE NOTE:** The three successive ballot windows are NOT being extended and will be closing at **8 p.m. Eastern on Thursday, January 12, 2012 as previously announced. The extension only applies to the non-binding polls of VRFs and VSLs.**

### Instructions for Casting Opinions in Non-binding Polls

Members of the ballot pools associated with this project may log in and submit their votes for the standards and opinions for the non-binding polls from the following page:

<https://standards.nerc.net/CurrentBallots.aspx>.
