Standards Announcement Ballot Pool and Pre-ballot Window August 31–September 30, 2009

Now available at: https://standards.nerc.net/BallotPool.aspx

Project 2008-10: Interpretation for CIP-006-1 Requirement R1.1 for Progress Energy A revised interpretation of standard CIP-006-1 — Physical Security of Critical Cyber Assets Requirement R1.1 for Progress Energy is posted for a 30-day pre-ballot review. Registered Ballot Body members may join the ballot pool to be eligible to vote on this interpretation **until 8 a.m. EDT on September 30, 2009**.

During the pre-ballot window, members of the ballot pool may communicate with one another by using their "ballot pool list server." (Once the balloting begins, ballot pool members are prohibited from using the ballot pool list servers.) The list server for this ballot pool is: <u>bp-2008-10 RFI PE Rev1 in</u>.

Next Steps

Voting will begin shortly after the pre-ballot review closes.

Project Background

Progress Energy asked if electronic security perimeter wiring external to a physical security perimeter must be protected within a six-wall boundary. The team has revised the interpretation based on stakeholder comments submitted during the initial ballot for the first draft of the interpretation.

The request and interpretation can be found on the project page: <u>http://www.nerc.com/filez/standards/Project2008-10_CIP-006_Interpretation_Progress.html</u>

Standards Development Process

The <u>Reliability Standards Development Procedure</u> contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.

For more information or assistance, please contact Shaun Streeter at <u>shaun.streeter@nerc.net</u> or at 609.452.8060.
