# Interpretation of MOD-001-1 and MOD-029-1 for the New York Independent System Operator (Project 2009-15)

The recirculation ballot for an interpretation of MOD-001-1 — Available Transmission System Capability, Requirements R2 and R8, and MOD-029-1 — Rated System Path Methodology, Requirements R5 and R6, for the New York Independent System Operator ended July 17, 2009.

#### **Ballot Results**

Voting statistics are listed below, and the Ballot Results Web page provides a link to the detailed results:

Quorum: 90.26% Approval: 82.25%

The ballot pool approved the interpretation. Ballot criteria details are listed at the end of the announcement.

## **Next Steps**

The interpretation will be submitted to the NERC Board of Trustees for adoption.

## **Project Background**

The request asks the following questions:

- 1. Is the "advisory ATC" used under the NYISO tariff subject to the ATC calculation and recalculation requirements in MOD-001-1 Requirements R2 and R8? If not, is it necessary to document the frequency of "advisory" calculations in the responsible entity's Available Transfer Capability Implementation Document?
- 2. Could  $OS_F$  in MOD-029-1 Requirement R5 and  $OS_{NF}$  in MOD-029-1 Requirement R6 be calculated using Transmission Flow Utilization in the determination of ATC?

The request and interpretation can be found on the project page: http://www.nerc.com/filez/standards/Project2009-15\_Interpretation\_MOD\_NYISO.html

#### **Standards Development Process**

The <u>Reliability Standards Development Procedure</u> contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.

**Ballot Criteria:** Approval requires both a (1) quorum, which is established by at least 75% of the members of the ballot pool for submitting either an affirmative vote, a negative vote, or an abstention, and (2) A two-thirds majority of the weighted segment votes cast must be affirmative; the number of votes cast is the sum of affirmative and negative votes, excluding abstentions and nonresponses. If there are no negative votes with reasons from the first ballot, the results of the first ballot shall stand. If, however, one or more members submit negative votes with reasons, a second ballot shall be conducted.
