

Violation Risk Factor and Violation Severity Level Justifications

TPL-007-3 – Transmission System Planned Performance for Geomagnetic Disturbance Events

The Project 2018-01 Standard Drafting Team reviewed the Violation Risk Factors (VRFs) and Violation Severity Levels (VSLs) for each requirement in Reliability Standard TPL-007-2 (Transmission System Planned Performance for Geomagnetic Disturbance Events) and determined that no modifications to the VRFs and VSLs are necessary for the proposed TPL-007-3 (Canadian Variance). Since the VRFs and VSLs do not require modifications, the applicable justifications for those VRFs and VSLs will also remain the same as applied to the proposed TPL-007-2 (Canadian Variance).
