

Comment Report

Project Name: Regional Reliability Standard (WECC) | FAC-501-WECC-4 – Transmission Maintenance
Comment Period Start Date: 8/16/2023
Comment Period End Date: 9/29/2023
Associated Ballots:

There were 12 sets of responses, including comments from approximately 17 different people from approximately 12 companies representing 4 of the Industry Segments as shown in the table on the following pages.

Questions

- 1. Do you agree the proposed Regional Reliability Standard was developed in a fair and open process, using the associated Regional Reliability Standards Development Procedure?**

- 2. Does the proposed Regional Reliability Standard pose an adverse impact to reliability or commerce in a neighboring region or interconnection?**

- 3. Does the proposed Regional Reliability Standard pose a serious and substantial threat to public health, safety, welfare, or national security?**

- 4. Does the proposed Regional Reliability Standard pose a serious and substantial burden on competitive markets within the interconnection that is not necessary for reliability?**

- 5. Does the proposed Regional Reliability Standard meet at least one of the following criteria**
 - The proposed Regional Reliability Standard has more specific criteria for the same requirements covered in a continent-wide standard.**
 - The proposed Regional Reliability Standard has requirements that are not included in the corresponding continent-wide standard.**
 - The proposed regional difference is necessitated by a physical difference in the Bulk Power System.**
