

**ICTE TLR 5 Investigation Report
Flowgate 1345
(Mabelvale - Bryant 115 kV for the loss of Sheridan - El Dorado 500 kV)
TLR Level 5: April 20, 2009
Report Issued:**

1. Description of purpose/cause of hold/curtailment.

This report is submitted in accordance with the NERC Transmission Loading Relief Investigation Procedure for the TLR 5 event that occurred on Flowgate 1345 on April 20, 2009. Flowgate 1345 is an Entergy flowgate. The TLR 5 was in effect from 2:40 PM on April 20, until 8:52 AM on April 21, 2009. Projected post-contingent flows on the Mabelvale - Bryant 115 kV line for the loss of the Sheridan - El Dorado 500 kV line exceeded the SOL.

2. Facility/flowgate limitations and flows at the time the TLR was initiated.

At the time the TLR 5a was issued, the Limiting Element was rated at 159 MVA. Flow on the Limiting Element was 59 MVA. Flow on the Contingent Element was 924 MVA. The LODF was approximately 11%. Post-contingent flow on the Limiting Element was approximately 161 MVA.

3. TLR levels, timing, and relief requested amounts.

TLRs levels, timing and relief requested amounts are shown on pages 3 through 6.

4. Transmission and generation outages or changes from prediction that may have contributed.

The planned outage of Magnet Cove – Sheridan 500 kV affected this flowgate.

5. Procedures implemented prior to hold/curtailment.

Curtailed non-firm transactions, not enough non-firm to alleviate the flowgate.

6. The initial investigation shall compare all transaction curtailment lists as generated by the IDC with the list of transactions flowing as determined by the IDC (Whole Transaction Lists) both before and after curtailment. The reasons for any transactions that were excluded from curtailment shall be provided. For those transactions not curtailed, the Reliability Authority will identify those entities and any affiliation with said entities.

There were no known transactions excluded from curtailment for this TLR.

7. List of known transactions not in the IDC with Transaction Contribution Factors greater than the curtailment threshold and actions taken to curtail such transactions.

There were no known transactions not in the IDC.

8. Excerpts from the RA Operations Log containing information relevant to the TLR event.

Information was provided to Reliability Coordinators through the IDC and the RCIS. Also the ICTE Reliability Coordinators logged information describing the actions taken at each issuance of the TLR.

9. Flowgate limitations as identified by security analysis processes conducted by the Reliability Authority for the day prior to the TLR event.

In the next day process, we did not see an issue with this flowgate, based off of the peak study.

10. State Estimator snapshots and security analysis, including any contingency analysis or stability analysis, along with any other recorded data indicating need for TLR.

The ICTE Reliability Coordinator was monitoring their state estimator for potential issues during this time. Screen shots were taken during each issuance of the TLR level 5.

11. ATC limitations before, during, and after the TLR event.

ICT Tariff Administration grants transmission service using an AFC process. This process evaluates each transmission request on a case by case basis. There are no ATC values for individual corridors to or from the Entergy system. ICT Tariff Administration was not granting any transmission requests that impacted the congested flowgate by 3 % or greater at the time of the TLR 5.

12. Description of actions taken to avoid future hold/curtailments.

This TLR was caused by a combination of generation patterns, load, and system flows. Due to this situation, no actions were taken to avoid future hold/curtailments.

13. Provide IDC generated Congestion Management Reports showing transaction curtailment list and Control Area NNL (network and native load) curtailment responsibility.

Congestion Management Reports for each issuance of the TLR have been reviewed and kept on file. These screen shots are not being provided to reduce the size of this report

14. Re-dispatch actions taken.

Entergy achieved their NNL obligation by moving Sabine and White Bluff 2.

Event History

Issuing RC: ICTE
Flowgate: 1345 - Mabelvale-Bryant for the loss of Sheridan - El Dorado
Event Begin: 2009-04-20 14:00
Event End: 2009-04-23 12:40
Event Duration: 70 Hours

| TLR Level | TLR Date (CST) | TLR Confirm Time (CST) | Run Time (CST) | Requested Relief | Remaining Relief | Relief Provided | Total Cuts | |
