

Implementation Plan

VAR-001-2 WECC Variance

The Project WECC-0046 Regional Variance Drafting Team proposes that the WECC Variance become effective on the first day of the first calendar quarter six months after applicable regulatory approval, or in those jurisdictions where no regulatory approval is required, the first day of the first calendar quarter six months after NERC Board of Trustees' approval. Six months will provide Transmission Operators sufficient time to review scheduling practices; to revise existing procedures and other documents that contain scheduling practices; and to distribute any required revisions to those documents in order to be in compliance with the WECC Variance. Six months will also allow time for Generator Operators to develop voltage schedule conversion methodologies from the reference point to the AVR set point as required in the WECC Regional Variance to VAR-001-2 Requirement E.A.16.
