RELIABILITY CORPORATION

## Regional Reliability Standards Announcement

Comment Period Open for MOD-025-RFC-01

April 8-May 23, 2011

### Now available at:

[http://www.nerc.com/filez/regional\\_standards/regional\\_reliability\\_standards\\_under\\_development.html](http://www.nerc.com/filez/regional_standards/regional_reliability_standards_under_development.html)

### Proposed Standard for the ReliabilityFirst Corporation (RFC)

RFC has requested NERC to post regional reliability standard MOD-025-RFC-01 —Verification and Data Reporting of Generator Gross and Net Reactive Power Capability for a 45-day industry review. This standard was previously posted for comment on the NERC web site, and based on comments received RFC has made changes to the standard. RFC and NERC are now soliciting comments on this modified standard.

### Instructions

Please use this [electronic form](#) to submit comments. If you experience any difficulties in using the electronic form, please contact [monica.benson@nerc.net](mailto:monica.benson@nerc.net). An off-line, unofficial copy of the comment form is posted on the regional standards development page:

[http://www.nerc.com/filez/regional\\_standards/regional\\_reliability\\_standards\\_under\\_development.html](http://www.nerc.com/filez/regional_standards/regional_reliability_standards_under_development.html)

### Background

The purpose of the standard is to ensure that planning entities have accurate generator gross and net Reactive Power capability modeling data to use in system planning studies. This standard was also developed to meet the “fill in the blank” requirements assigned to the Regional Reliability Organization as set forth in the NERC approved MOD-025-1 standard, and will also replace the legacy documents from the three previous Regions.

### Regional Reliability Standards Development Process

Section 300 of the [Rules of Procedure for the Electric Reliability Organization](#) governs the regional reliability standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
