Project 2009-25: Interpretation of BAL-001-0.1a and BAL-002-0 for the Bonneville Power Administration

The initial ballot for an interpretation of standards BAL-001-0.1a — Real Power Balancing Control Performance and BAL-002-0 — Disturbance Control Performance for the Bonneville Power Administration ended on January 15, 2010.

Ballot Results

Voting statistics are listed below, and the [Ballot Results](#) Web page provides a link to the detailed results:

Quorum: 88.00%
Approval: 34.28%

Since at least one negative ballot included a comment, these results are not final. A second (or recirculation) ballot must be conducted. Ballot criteria are listed at the end of the announcement.

Next Steps

As part of the recirculation ballot process, the drafting team must draft and post responses to voter comments. The drafting team will also determine whether or not to make revisions to the balloted item(s). Should the team decide to make revisions, the revised item(s) will return to the initial ballot phase.

Project Background

Bonneville Power Administration requested clarification on the reference to Area Control Error (ACE) in BAL-002-0 Requirement R4, whether or not the ACE can include an ACE Diversity Interchange (ADI) offset, and if ADI as implemented in Western Interconnection meets the reporting standards.

The request and interpretation can be found on the project page:

http://www.nerc.com/filez/standards/Project2009-25_BAL-001-1_BAL-002-0_RFI_BPA.html

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.

Ballot Criteria

Approval requires both a (1) quorum, which is established by at least 75% of the members of the ballot pool for submitting either an affirmative vote, a negative vote, or an abstention, and (2) A two-thirds majority of the weighted segment votes cast must be affirmative; the number of votes cast is the sum of affirmative and negative votes, excluding abstentions and nonresponses. If there are no negative votes with reasons from the first ballot, the results of the first ballot shall stand. If, however, one or more members submit negative votes with reasons, a second ballot shall be conducted.
