

Standards Announcement

Initial Ballot Window Open

April 1–10, 2009

Now available at: <https://standards.nerc.net/CurrentBallots.aspx>

Revisions to Cyber Security Standards CIP-002-1 through CIP-009-1 (Project 2008-06)

An initial ballot window for revisions to cyber security standards CIP-002-1 through CIP-009-1 is now open **until 8 p.m. EDT on April 10, 2009**. The posting includes an associated implementation plan for the standards.

Project Background

The Cyber Security Standard Drafting Team has been assigned the responsibility of revising the cyber security standards as follows:

- ensure the standards conform to the latest version of the ERO Rules of Procedure, including the Reliability Standards Development Procedure,
- address the directed modifications identified in FERC Order 706, and
- consider other cyber-related standards, guidelines, and activities.

The drafting team subdivided its work into multiple phases, with “Phase I” (the current phase) focused on addressing near term directives in FERC Order 706. The most significant of these revisions addresses the directive to remove references to “reasonable business judgment” before compliance audits begin in 2009. All issues that will require significant industry debate were deferred to later phases of the project to ensure that the FERC imposed deadline for removing “reasonable business judgment” can be met.

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
