Initial Ballot Results for Interpretation of EOP-002-2 (Project 2008-07)

The initial ballot results for the revised interpretation of EOP-002-2 — Capacity and Energy Emergencies, Requirements R6.3 and R7.1 (requested by Brookfield Power) are shown below:

Quorum: 55.43 %

Approval: 71.98 %

Approval requires both:

- A quorum, which is established by at least 75% of the members of the ballot pool for submitting either an affirmative vote, a negative vote, or an abstention; and
- A two-thirds majority of the weighted segment votes cast must be affirmative. The number of votes cast is the sum of affirmative and negative votes, excluding abstentions and nonresponses.

A quorum was not reached; therefore, the standard will be re-balloted. The [Ballot Results](#) Web page provides a link to the detailed results of this ballot.

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
