

Bringing Power Home.

June 4, 2010

City Utilities of Springfield, Missouri (CU) appreciates the opportunity to provide comments on the proposed changes to Section 300 in the NERC Rules of Procedure. CU understands the concern that FERC has for how their directives are addressed. However, we believe that the current open and transparent process is working, although slow, to thoroughly evaluate directives by industry subject matter experts. If the directive is related to an emerging threat to Bulk Electric System reliability, then CU would support such a process. But there must be clear guidance when and how this process is implemented.

In addition CU supports comments submitted by the Trade Associations.

Sincerely,

John Allen
Manager – Reliability Compliance
City Utilities of Springfield, Missouri
