

Comments for proposed amendments to NERC Rules of Procedure Section 300: NERC Stakeholders

We have the following questions:

- Is the Board of Trustees the sole entity that is authorized to determine that the standards process "has failed to produce a standard that addresses a specific matter that is contained in a directive"?
- What criteria does the Board of Trustees apply in determining that the standards process "has failed to produce a standard that addresses a specific matter that is contained in a directive"? We find no mention of criteria other than references to meeting a deadline imposed by ERO governmental authority (i.e., FERC).
