

Appendix C – Utility and Unit Identification Codes

Utility Identification Code

NERC assigns each utility participating in the Generating Availability Data System (GADS) a unique identification code. This three digit code allows each system's data to be uniquely catalogued and filed in the database. This appendix contains a list of the codes for each utility system presently participating or assigned a NERC-GADS utility code.

Unit Identification Code

Each utility participating in GADS assigns unique identification codes to its units. This three digit code allows each unit's data to be uniquely catalogued and filed in the database.

Note that each utility must assign identification codes for individual units based on the following criteria:

Table 1: Unit Identification Codes	
Unit Type	Coding Series
Fossil (Steam) (Use 600-649 if additional numbers are needed)	100 - 199
Nuclear	200 - 299
Combustion Turbines (Gas Turbines or Jet Engines) (Use 700-799 if additional numbers are needed)	300 - 399
Diesel Engines	400 - 499
Hydro/Pumped Storage (Use 900-999 if additional numbers are needed)	500 - 599
Fluidized Bed Combustion	650 - 699
Miscellaneous (Multi-Boiler/Multi-Turbine, Geothermal, Combined Cycle Block, Concentrated Solar Power, etc.)	800 - 899
