Q. Who is OATI and what service do they provide to NERC?

A. OATI stands for *Open Access Technology International* who specializes in offering software solutions to the energy industry in North America. OATI created the database called WebE-GADS with an interactive web interface for GOs and GOPs to submit their data to NERC. On April 24th 2012, the web based application went into production for all utilities to use in their data submissions to NERC.
