

Standards Announcement

Project 2008-12 Coordinate Interchange Standards INT-004-3 and INT-010-2

Final Ballots Now Open Through February 5, 2014

[Now Available](#)

Final ballots for **INT-004-3 (Dynamic Transfers)** and **INT-010-2 (Interchange Initiation and Modification for Reliability)**, are now open through **8 p.m. Eastern on Wednesday, February 5, 2014.**

The Coordinate Interchange Standard Drafting Team has reviewed the comments from the comment period and ballots that ended on January 22, 2014 and adopted a number of suggestions, including minor clarifications to language in Requirements, VSLs, and the Guideline and Technical Basis of the standards. None of the changes are substantive. A complete list of the changes to each standard is provided in the Consideration of Comments posted on the [project page](#).

Instructions for Balloting

In the final ballot, votes are counted by exception. Only members of the ballot pool may cast a ballot; all ballot pool members may change their previously cast votes. A ballot pool member who failed to cast a ballot during the last ballot window may cast a ballot in the final ballot window. If a ballot pool member does not participate in the final ballot, that member's vote cast in the previous ballot will be carried over as that member's vote in the final ballot.

Members of the ballot pool associated with this project may log in and submit their vote for the standard by clicking [here](#).

Next Steps

Voting results for the standard will be posted and announced after the ballot window closes. If approved, the standard will be submitted to the Board of Trustees for adoption.

Standards Development Process

The [Standards Processes Manual](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
