

## Standards Announcement

### Project 2010-03 Modeling Data (MOD B) MOD-033-1

**A Final Ballot is now open through February 5, 2014**

#### [Now Available](#)

A final ballot for **MOD-033-1 – Stead-State and Dynamic System Model Validation** is open through **8 p.m. Eastern on Wednesday, February 5, 2014.**

Background information for this project can be found on the [project page](#).

#### **Instructions**

In the final ballot, votes are counted by exception. Only members of the ballot pool may cast a ballot; all ballot pool members may change their previously cast votes. A ballot pool member who failed to cast a ballot during the last ballot window may cast a ballot in the final ballot window. If a ballot pool member does not participate in the final ballot, that member's vote cast in the previous ballot will be carried over as that member's vote in the final ballot.

Members of the ballot pool associated with this project may log in and submit their vote for the standard by clicking [here](#).

#### **Next Steps**

Voting results for the standard will be posted and announced after the ballot window closes. If approved, the standard will be submitted to the Board of Trustees for adoption.

#### **Standards Development Process**

The [Standard Processes Manual](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
