December 30, 2011

Ms. Kimberly D. Bose Secretary Federal Energy Regulatory Commission 888 First Street, N.E. Washington, D.C. 20426

Re: NERC Spreadsheet Notice of Penalty FERC Docket No. NP12-__-000

Dear Ms. Bose:

The North American Electric Reliability Corporation (NERC) hereby provides the attached Spreadsheet Notice of Penalty¹ (Spreadsheet NOP) in Attachment A regarding 21 Registered Entities² listed therein,³ in accordance with the Federal Energy Regulatory Commission's (Commission or FERC) rules, regulations and orders, as well as NERC Rules of Procedure including Appendix 4C (NERC Compliance Monitoring and Enforcement Program (CMEP)).⁴

The Spreadsheet NOP resolves 54 violations⁵ of 16 Reliability Standards. In order to be a candidate for inclusion in the Spreadsheet NOP, the violations are those that had a minimal or moderate impact on the reliability of the bulk power system (BPS). In all cases, the NOP sets forth whether the violations have been mitigated, certified by the respective Registered Entities as mitigated, and verified by the Regional Entity as having been mitigated.

² Corresponding NERC Registry ID Numbers for each Registered Entity are identified in Attachment A.

³ Attachment A is an excel spreadsheet.

¹ Rules Concerning Certification of the Electric Reliability Organization; and Procedures for the Establishment, Approval, and Enforcement of Electric Reliability Standards (Order No. 672), III FERC Stats. & Regs. ¶ 31,204 (2006); Notice of New Docket Prefix "NP" for Notices of Penalty Filed by the North American Electric Reliability Corporation, Docket No. RM05-30-000 (February 7, 2008). See also 18 C.F.R. Part 39 (2011). Mandatory Reliability Standards for the Bulk-Power System, FERC Stats. & Regs. ¶ 31,242 (2007) (Order No. 693), reh'g denied, 120 FERC ¶ 61,053 (2007) (Order No. 693-A). See 18 C.F.R § 39.7(c)(2). See also Notice of No Further Review and Guidance Order, 132 FERC ¶ 61,182 (2010).

⁴ See 18 C.F.R § 39.7(c)(2).

⁵ For purposes of this document, each violation at issue is described as a "violation," regardless of its procedural posture and whether it was a possible, alleged or confirmed violation.

NERC

NERC Spreadsheet Notice of Penalty December 30, 2011 Page 2

The violations at issue in the Spreadsheet NOP are being filed with the Commission because the Regional Entities have respectively entered into settlement agreements with, or have issued Notices of Confirmed Violations (NOCVs) to, the Registered Entities identified in Attachment A and have resolved all outstanding issues arising from preliminary and non-public assessments resulting in the Regional Entities' determination and findings of the enforceable violation of the Reliability Standards identified in Attachment A. As designated in the attached spreadsheet, some of the Registered Entities have admitted to the violations, while the others have indicated that they neither admit nor deny the violations and have agreed to the proposed penalty as stated in Attachment A or did not dispute the violations and proposed penalty amount stated in Attachment A, in addition to other remedies and mitigation actions to mitigate the instant violations and ensure future compliance with the Reliability Standards. Accordingly, all of the violations, identified as NERC Violation Tracking Identification Numbers in Attachment A, are being filed in accordance with the NERC Rules of Procedure and the CMEP.

As discussed below, this Spreadsheet NOP resolves 54 violations. NERC respectfully requests that the Commission accept this Spreadsheet NOP.

Statement of Findings Underlying the Alleged Violations

The descriptions of the violations and related risk assessments are set forth in Attachment A.

This filing contains the basis for approval in accordance with Section 39.7 of the Commission's regulations, 18 C.F.R. § 39.7 (2011). Each Reliability Standard at issue in this Notice of Penalty is set forth in Attachment A.

Text of the Reliability Standards at issue in the Spreadsheet NOP may be found on NERC's web site at <u>http://www.nerc.com/page.php?cid=2|20</u>. For each respective violation, the Reliability Standard Requirement at issue and the applicable Violation Risk Factor are set forth in Attachment A.

Unless otherwise detailed within the Spreadsheet NOP, the Registered Entities were cooperative throughout the compliance enforcement process; there was no evidence of any attempt to conceal a violation or evidence of intent to do so. In accordance with the Guidance Order issued by FERC concerning treatment of repeat violations and violations of corporate affiliates, the violation history for the Registered Entities and affiliated entities who share a common corporate compliance program is detailed in Attachment A when that history includes violations of the same or similar Standard. Additional mitigating, aggravating, or extenuating circumstances beyond those listed above are detailed in Attachment A.

Status of Mitigation⁶

The mitigation activities are described in Attachment A for each respective violation. Information also is provided regarding the dates of Registered Entity certification and the Regional Entity verification of such completion where applicable.

Statement Describing the Proposed Penalty, Sanction or Enforcement Action Imposed⁷

Basis for Determination

Taking into consideration the Commission's direction in Order No. 693, the NERC Sanction Guidelines and the Commission's July 3, 2008 Guidance Order, the October 26, 2009 Guidance Order and the August 27, 2010 Guidance Order,⁸ the violations in the Spreadsheet were approved by NERC Enforcement staff under delegated authority from the NERC Board of Trustees Compliance Committee. Such considerations include the Regional Entities' imposition of financial penalties as reflected in Attachment A, based upon its findings and determinations, the NERC Enforcement staff's review of the applicable requirements of the Commission-approved Reliability Standards, and the underlying facts and circumstances of the violations at issue.

Pursuant to Order No. 693, the penalties will be effective upon expiration of the 30-day period following the filing of this Notice of Penalty with FERC, or, if FERC decides to review any specific penalty, upon final determination by FERC.

Request for Confidential Treatment of Certain Attachments

Certain portions of Attachment A include confidential information as defined by the Commission's regulations at 18 C.F.R. Part 388 and orders, as well as NERC Rules of Procedure including the NERC CMEP Appendix 4C to the Rules of Procedure. This includes non-public information related to certain Reliability Standard violations and confidential information regarding critical energy infrastructure.

⁶ See 18 C.F.R § 39.7(d)(7).

⁷ See 18 C.F.R § 39.7(d)(4).

Violation Risk Factor Revision History Applicable to the Spreadsheet Notice of Penalty

Some of the Violation Risk Factors in the Notice of Penalty spreadsheet can be attributed to the violation being assessed at a main requirement or sub-requirement level. Also, some of the Violation Risk Factors were assigned at the time of discovery. Over time, NERC has filed new Violation Risk Factors, which have been approved by FERC.

- CIP-003-1 R1 has a Medium VRF; CIP-003-1 R1.1, R1.2 and R1.3 each have a Lower VRF. When NERC filed VRFs it originally assigned CIP-003-1 R1 a Lower VRF. The Commission approved the VRF as filed; however, it directed NERC to submit modifications. NERC submitted the modified Medium VRF and on January 27, 2009, the Commission approved the modified Medium VRF. Therefore, the Lower VRF for CIP-003-1 R1 was in effect from June 18, 2007 until January 27, 2009, when the Medium VRF became effective.
- CIP-004-1 R4 and R4.1 each have a Lower VRF; R4.2 has a Medium VRF. When NERC filed VRFs, it originally assigned CIP-004-1 R4.2 a Lower VRF. The Commission approved the VRF as filed; however, it directed NERC to submit modifications. NERC submitted the modified Medium VRF and on January 27, 2009, the Commission approved the modified Medium VRF. Therefore, the Lower VRF for CIP-004-1 R4.2 was in effect from June 18, 2007 until January 27, 2009 when the Medium VRF became effective. The VRFs for CIP-004-3 R4 were not changed when CIP-004-3 went into effect on October 1, 2010.

NERC submitted the modified Medium VRF and on August 6, 2007, the Commission approved the modified Medium VRF. Therefore, the Lower VRF for MOD-010-0 R2 was in effect from June 18, 2007 until August 6, 2007 when the Medium VRF became effective.

- When NERC filed VRF it originally assigned PRC-005-1 R1 a Medium VRF. The Commission approved the VRF as filed; however, it directed NERC to submit modifications. NERC submitted the modified High VRF and on August 9, 2007, the Commission approved the modified High VRF. Therefore, the Medium VRF for PRC-005-1 R1 was in effect from June 18, 2007 until August 9, 2007 when the High VRF became effective.
- PRC-005-1 R2 has a Lower VRF; R2.1 and R2.2 each have a High VRF. During a final review of the standards subsequent to the March 23, 2007 filing of the Version 1 VRFs, NERC identified that some standards requirements were missing VRFs; one of these include PRC-005-1 R2.1. On May 4, 2007, NERC assigned PRC-005 R2.1 a High VRF. In the Commission's June 26, 2007 Order on Violation Risk Factors, the Commission approved the PRC-005-1 R2.1 High VRF as filed. Therefore, the High VRF was in effect from June 26, 2007.
