RE: Errata to the North American Electric Reliability Corporation Filing of Proposed Reliability Standards PRC-004-2.1(i)a, PRC-004-4, PRC-005-2(i), PRC-005-3(i), and VAR-002-4

Dear Ms. Walli:

On February 25, 2015, the North American Electric Reliability Corporation (“NERC”) submitted a filing of proposed Reliability Standards PRC-004-2.1(i)a, PRC-004-4, PRC-005-2(i), PRC-005-3(i), and VAR-002-4 (“Filing”).

It has come to NERC’s attention that the Implementation Plans for PRC-005-2(i) and PRC-005-3(i), as submitted, need to be modified to properly sequence the version numbering and effective dates for PRC-005-2(i) and PRC-005-3(i) to ensure that the implementation of these Reliability Standards carries forth the intention of the standard drafting team responsible for development. The errata clarifies that PRC-005-2(i) should become effective concurrently with or after the effective date of PRC-005-2, and that PRC-005-3(i) should become effective concurrently with or after the effective date of PRC-005-3.

The proposed modifications are identified in the redline versions of the revised Implementation Plans, submitted herein as Exhibit A. The proposed clean versions of the revised Implementation Plans, which shall replace the Implementation Plans for PRC-005-2(i) and PRC-005-3(i) in the Filing, are submitted as Exhibit B.
Respectfully submitted,

/s/ Milena Yordanova
