Re: Clarifying Supplemental Information Updating Implementation Plan

Dear Ms. Walli:

As noted in NERC’s initial filing of Reliability Standard PRC-004-5, submitted on June 17, 2015, “Proposed Reliability Standard PRC-004-5 is intended to replace prior versions of PRC-004.”1 Similarly, PRC-004-4, which becomes effective on July 1, 2016 is intended to supersede and retire any prior version of the standard. NERC respectfully requests to supplement its pending filing for Reliability Standard PRC-004-5 with the replacement Implementation Plan attached as Exhibit A to expressly clarify out of an abundance of caution that the Implementation Plan applies to Reliability Standard PRC-004-5(i) (reflecting the VRF revisions) and that upon effectiveness of Reliability Standard PRC-004-5(i), all prior versions of Reliability Standard PRC-004 will be retired. Similarly, for the avoidance of confusion, NERC seeks to supplement its errata filed on September 2, 2105 to provide an updated Implementation Plan on Reliability Standard PRC-004-4. The Implementation Plans is just, reasonable, not unduly discriminatory or preferential, and in the public interest.

Respectfully submitted,

/s/ Candice Castaneda
