

UNITED STATES OF AMERICA  
FEDERAL ENERGY REGULATORY COMMISSION

Version Two Facilities Design,  
Connections and Maintenance  
Reliability Standards

Docket No. RM08-11-000

NOTICE OF EXTENSION OF TIME

(June 9, 2009)

On May 29, 2009, the North American Reliability Corporation (NERC) filed a motion for an extension of time to comply with Paragraph 99 of Commission Order No. 722 issued March 20, 2009, in the above-referenced proceeding. *Version Two Facilities Design, Connections and Maintenance Reliability Standards*, 126 FERC ¶ 61,255 (2009). Order No. 722 directed NERC to submit modifications to Violation Severity Levels for three revised Facilities Design, Connections and Maintenance Reliability Standards and to make modifications to the Western Electric Coordinating Council's (WECC) Violation Risk Factors (VRFs). The motion states that NERC requires additional time to submit the revisions to the WECC VRFs in order to allow the WECC Board of Directors and the NERC Board of Trustees sufficient time to consider the modifications.

Upon consideration, notice is hereby given that NERC is granted an extension of time to and including June 29, 2009, to submit a compliance filing in response to Paragraph 99 of Commission Order No. 722.

Kimberly D. Bose,  
Secretary.
