FEDERAL ENERGY REGULATORY COMMISSION

Frequency Response Metrics to Assess Requirements Docket No. AD11-8-000
for Reliable Integration of Variable Renewable
Generation

NOTICE INVITING COMMENTS ON REPORT

(January 20, 2011)

The Commission is posting, and inviting comment upon, a report prepared by the Lawrence Berkeley National Laboratory, “Use of Frequency Response Metrics to Assess the Planning and Operating Requirements for Reliable Integration of Variable Renewable Generation” and its five supporting papers (collectively, “the Report”).

Frequency response measures how the bulk power system performs in responding to a sudden loss of generation that could cause reliability problems such as blackouts. The purpose of the Report is to develop an objective methodology to evaluate the reliability impacts of varying resource mixes including increased amounts of renewable resources. The Report accomplishes this objective by developing and testing tools that can be used to assess and plan for the operational requirements of the bulk power system. The Report may assist the Commission in the development of policies relating to the issues raised in the Report.

The Report will be posted on the Commission’s website at <http://www.ferc.gov>.

Comments on the Report should be filed within 45 days of the issuance of this Notice. The Commission encourages electronic submission of comments in lieu of paper using the “eFiling” link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 14 copies of the comment to the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426.

All filings in this docket are accessible on-line at <http://www.ferc.gov>, using the “eLibrary” link and will be available for review in the Commission’s Public Reference Room in Washington, D.C. There is an “eSubscription” link on the web site that enables subscribers to receive email notification when a document is added to a subscribed docket. For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.
