

IDC Regional Congestion Management Training Document *February 2007*

Changes to the TLR Main Page

The TLR Main Page has incorporated a few minor changes in an effort to make the User Interface more user friendly and to provide more useful information. The screenshots below compare the old Main Page to the newly enhanced Main Page.

The changes include the following:

- The header of the TLR Level column is renamed to “Level”, and the contents of the column only contain the TLR level; that is, the word “TLR Level 3A” is changed to “3A”. This saves some real-estate on the page and can prevent left-right scrolling.
- The contents of the TLR Date (CST) column no longer contain the four-digit year. Since the active TLR page shouldn’t have TLRs more than a day old, the mm/dd combination will suffice. This also saves real-estate and can prevent left-right scrolling.
- The most significant change is a column with header “Pending Acknowledgement” (fourth column from the left). This column lists all RCs that have pending acknowledgements on the TLR, whether a tag, market flow, hold or NNL. In a quick glance the issuing RC would know who to contact in case a curtailment is not acknowledged, without having to open the CMR.

Old Main Page
