			NM		
	Other companies not reporting GADS data	\$3,000	MT		
			NM		
				Total	

Effective June 2013: As a new procedure in the NERC PC-GAR software ordering process, all requests for PC-GAR must be reviewed and approved by NERC management. If the request is approved, then NERC staff will contact you to confirm the price and version of PC-GAR you can receive. NERC accounting will then issue an invoice for the PC-GAR payment which must be paid before NERC will issue the software subject to your agreement to the terms of use. There are no exceptions. If your request for PC-GAR is declined, then NERC will notify you. Note: This does not include data updates for existing, active licenses.
