

# Meeting Notes

## Project 2020-02 Modifications to PRC-024 (Generator Ride-through) Drafting Team

January 8, 2024 | 11:00 a.m. - 1:00 p.m. Eastern

Conference Call with Web Access

### Administrative

**1. Review NERC Antitrust Compliance Guidelines and Public Announcement**

**2. Determination of Quorum**

The rule for NERC Standard Drafting Team (SDT) states that a quorum requires two-thirds of the voting members of the SDT to be physically present. Quorum was met. See table below for meeting attendance.

**3. Introductions and Chair's Remarks**

### Agenda Items

**1. Finalize questions for informal comment period and technical rationale**

**2. Review current timeline**

**3. Review sub-team assignments for draft**

**4. Discuss next steps, timeline, and future meetings**

**5. Adjourn**

J. Calderon initiated the meeting, called roll, and reviewed the NERC Antitrust Guidelines and Participant Policy.

J. Calderon reviewed some information from recent FERC Order 901 discussions and the expectations that the associated teams will be collaborating throughout the development of 901-related standards projects. X. Wang shared that the leadership from this project (2020-02) and 2023-02 recently had some discussions to highlight how each of these projects would be covering specific portions of the 901 directives and how to build in an alignment of expectations and requirement language now to prevent issues as each draft is developed. The leadership of both teams have committed to continued conversations to assist this larger coordination effort.

The team primarily discussed R12 throughout this meeting. There was a need to make some modifications to the requirement language regarding how performance of IBR responses to phase angle changes would trigger a ride-through type criteria threshold. Conversations highlighted that instantaneous positive

sequence measurements would be inappropriate for determining if a phase angle change of “at least 25 electrical degrees” has occurred.

Finally, the team will be cleaning up the draft this week and ensure that all components of the attachment(s) are included in the online version of the document. This draft will be shared with the 2023-02 team to assist in that collaboration efforts and identify if any components of “performance” criteria that may be beyond the set of “ride-through” based criteria, could be considered as information that 2023-02 could leverage/include. Similar discussions will be had to identify if any “ride-through” criteria information should move from the 2023-02 scope/draft into the 2020-02 documents.

Attendance				
Name	Company	Member/ Observer	Straw Vote (X)	Conference Call/Web (Y/N)
Xiaoyu (Shawn) Wang	Enel North America	Chair		Y
Husam Al-Hadidi	Manitoba Hydro	Vice Chair		Y
Joel Anthes	Pacific gas and electric	Member		Y
Johnny Carlisle	Southern Company	Member		Y
Rajat Majumder	Ørsted North America	Member		N
Robert O’Keefe	AEP	Member		Y
Alex Pollock	AMSC	Member		N
Ebrahim Rahimi	California ISO	Member		Y
Fabio Rodriguez	Duke Energy Florida	Member		Y
