Agenda Items

- 1. Review Current Timeline**
- 2. Review Sub-team Assignments for Draft**
- 3. Discuss Next Steps, Timeline, and Future Meetings**
- 4. Adjourn**

J. Calderon initiated the meeting, called roll, and reviewed the NERC Antitrust Guidelines and Participant Policy.

The team reviewed and updated figures and made slight revisions to R4 – the overvoltage protection requirements. There is some desire to retain this requirement and clarify instances of persistent voltage measurements to allow those instances of current block mode. There have been iterations of this requirement that allowed for “options” of performance and what could be allowed rather than setting requirements on how the facility must perform. There is some argument here for including language that an applicable IBR must perform in a particular way, if set that way. However, others argue this allowance does not need to be specified if a compliance would need to be demonstrated for how this unit behaved as well as an assessment of how it was set to operate in this mode and why.
