J. Calderon initiated the meeting, called roll, and reviewed the NERC Antitrust Guidelines and Participant Policy.

The team reviewed modifications proposed by S. Solis and H. Al-Hadidi. There was some discussion on R11 and R13. Regarding R11 - proposed frequency deviations in attachment tables prompted some concerns from team members. Several team members were divided on whether to include the proposed bandwidth or not. The team will table this discussion until an informal comment period is conducted and additional feedback from industry is reviewed.

For R13, there were concerns with the language for allowance of current block mode. H. Al-Hadidi will provide some language modifications to assure that only some instances are expected to be allowable and dependent on other factors, such as the size of the plant (relative to the nearby area) and the location of the fault.
