

# Determine Facility Ratings, System Operating Limits, and Transfer Capabilities Standard

---

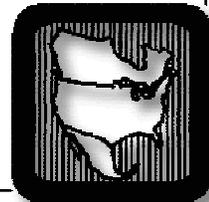

Paul Johnson  
Drafting Team Chairman  
August 7, 2003

# Overview

---

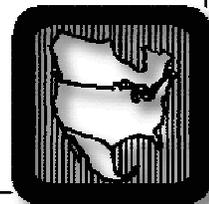

- Establish and communicate facility ratings, system operating limits, and transfer capabilities for reliable system planning and operation.
- Standard defines facility rating, system operating limit and transfer capability
- Now posted for industry comment and review (through August 29)

# Requirements

---

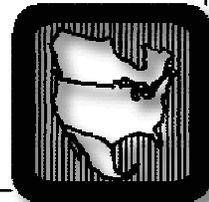

- Must document methodologies for facility ratings, system operating limits, and transfer capability determination
- Must determine these quantities in concert with methodology
- Must provide values as requested
- NPCC has requested a Regional Difference

# Requirements

---

- *All system operating limits must be determined*
  - Fine for RA's to prioritize, but that is not covered in this standard
  - Operation within the limits is not part of this standard
  - Standard assumes that reliability authorities have responsibility for system operating limits

# Compliance and Enforcement

---

- No financial penalties for document violations
- Flat nominal fines for value violations
