1. A brief conference call was held to finalize the responses to industry comments received in response to the first posting of this Standards Authorization Request (SAR). Revisions to the SAR were finalized on this conference call, as well.
2. The revised SAR, comment considerations and a set of questions for the industry will be posted for public review and comment on September 24. The comment period will remain open for 30 days, consistent with NERC's standards process.
3. No future meetings were scheduled. After the comment period closes, the team will review the industry comments on the second posting of this SAR and determine the need for a meeting at that time.
