Background

In May 2011, the Standards Committee appointed a standing CIP Interpretation Drafting Team (IDT) for the development of CIP Interpretations. A project team from the CIP IDT has reviewed Consumers Energy's request for interpretation and developed this interpretation pursuant to the NERC Guidelines for IDTs. Consumers Energy requested clarification on Section 4.1 of CIP-003-3 Requirement R2 as to if a registered entity can assign different CIP Senior Managers for different applicable functions it is registered for.

Additional information is available on the [project page](#).

Standards Development Process

The [Standards Processes Manual](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
