

2014 CIP Version 5 Revisions Calendar

The Project 2014-02 CIP Version 5 Revisions Standard Drafting Team (SDT) developed four sub-groups. The intent is to increase efficiencies and to allow industry to participate in focused discussions around the four main directives in FERC Order No. 791: (1) modify or remove the Identify, Assess, and Correct (IAC) language in 17 CIP requirements; (2) develop modifications to the CIP standards to address security controls for Low Impact assets; (3) develop requirements that protect transient electronic devices; and (4) create a definition of "communication networks" and develop new or modified Reliability Standards that address the protection of communication networks. Each sub-group will be led by two SDT members, one co-chair, and one NERC Standards Developer. There will also be weekly full-team conference calls to recap the prior week's work, update the action plan, and give updates on outreach opportunities.
