

# Standards Announcement

## Project 2007-11 Disturbance Monitoring

**Informal Request for Information: June 5, 2013 – July 5, 2013**

### [Now Available](#)

**To: Transmission Owners and Generator Owners**

**Cc: Reliability Coordinators and Planning Coordinators**

### **Informal Request for Information**

An informal request for information is open for a 30-day period from Wednesday, June 5, 2013 through 8 p.m. ET on **Friday, July 5, 2013**. **Please note: Response to this informal request for information is not mandatory.**

The Disturbance Monitoring Standard Drafting Team is considering using three phase bolted fault magnitude information to determine the locations for Disturbance Monitoring recording on the Bulk Electric System. The location criteria currently under consideration is based on limited information provided by members of the Standard Drafting Team. More information from industry will help to further refine the criteria.

The Disturbance Monitoring Standard Drafting Team is requesting that Transmission Owners and Generator Owners provide bus fault magnitude information for three phase bolted faults on buses operated at 100kV and higher in their areas. The information is to be provided in an electronic format (in an Excel spreadsheet) for the individual buses, and be given as current and the corresponding MVA values. The bus names on the submissions can be changed to preserve confidentiality, but the Standard Drafting Team requests the entity maintain a cross reference to facilitate recording location identification in the event additional information or clarification is needed.

### **Instructions for Submitting Information**

This informal information request to Transmission Owners, Generator Owners, Reliability Coordinators, and Planning Coordinators is **open through 8 p.m. ET on Friday, July 5, 2013**. Please submit your information to [Barb Nutter](#).

If you have any questions about the project or the informal information request, please contact [Barb Nutter](#) via email or by telephone at (404) 446.9692.

**Next Steps**

The timing of the informal request for information will allow for the information provided to be evaluated by the Drafting Team prior to the Workshops on July 30-31, and August 6-7, 2013.

Background information for this project can be found on the [project page](#).

**Standards Development Process**

The [Standards Processes Manual](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
