Project 2009-02: Real-time Reliability Monitoring and Analysis Capabilities

A second draft of the standard authorization request (SAR) has been posted by the Real-time Reliability Monitoring and Analysis Capabilities SAR Drafting Team. The team is seeking comments on the SAR **until 8 p.m. EDT on February 18, 2010**. The drafting team has also posted its consideration of industry comments received for the first draft of the SAR.

Instructions

Please use this [electronic form](#) to submit comments. If you experience any difficulties in using the electronic form, please contact Lauren Koller at Lauren.Koller@nerc.net. An off-line, unofficial copy of the comment form is posted on the project page: http://www.nerc.com/filez/standards/Project2009-02_Real-Time_Monitoring_Analysis_Capabilities.html

Next Steps

The drafting team will draft and post responses to comments received during this period.

Project Background

The purpose of this project is to draft new or revised standard(s) that will establish requirements for the functionality, performance, and change management of real-time capabilities for Reliability Coordinators, Transmission Operators, Generator Operators, and Balancing Authorities for use by their System Operators in support of reliable system operations.

The SAR addresses selected recommendations in the RTBPTF Report <http://www.nerc.com/filez/rtbptf.html> as determined by the Real-time Best Practices Standards Study Group (the group that initiated the work on this project) as well as directives identified in Federal Energy Regulatory Commission (FERC) [Order 693](#).

Applicability (as listed in the SAR)

Reliability Coordinator
Balancing Authority
Transmission Operator
Generator Operator

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
