

Standards Announcement Recirculation Ballot Window Open July 10–20, 2009

Now available at: <https://standards.nerc.net/CurrentBallots.aspx>

Project 2009-08: Revisions to Standard NUC-001-1 — Nuclear Plant Interface Coordination for Order 716

A recirculation ballot window for revisions to standard NUC-001-1 — Nuclear Plant Interface Coordination is now open **until 8 p.m. EDT on July 20, 2009**. An associated implementation plan has been posted with the revised standard.

Instructions

Members of the ballot pool associated with this project may log in and submit their votes from the following page: <https://standards.nerc.net/CurrentBallots.aspx>

Recirculation Ballot Process

The Standards Committee encourages all members of the ballot pool to review the consideration of comments submitted with the initial ballots. In the recirculation ballot, votes are counted by exception only — if a ballot pool member does not submit a revision to that member's original vote, the vote remains the same as in the first ballot. Members of the ballot pool may:

- Reconsider and change their vote from the first ballot.
- Vote in the second ballot even if they did not vote on the first ballot.
- Take no action if they do not want to change their original vote.

Next Steps

Voting results will be posted and announced after the ballot window closes.

Project Background

The Nuclear Plant Interface Coordination standard requires coordination between Nuclear Plant Generator Operators and Transmission Entities for the purpose of ensuring safe nuclear plant operation and shutdown. The proposed revisions address two directives in Federal Energy Regulatory Commission (FERC) Order 716 aimed at addressing stakeholder concerns for improved clarity. Additional revisions were made to change the term “Planning Authority” to “Planning Coordinator” (to match the terminology in the latest version of the Functional Model) and to bring the compliance elements of the standard into conformance with the latest version of the ERO Rules of Procedure.

Applicability of Standards in Project

Transmission Operators
Transmission Owners
Transmission Planners
Transmission Service Providers
Balancing Authorities
Reliability Coordinators
Planning Coordinators
Distribution Providers
Load-serving Entities
Generator Owners
Generator Operators

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate
