

## Standards Announcement Final Ballot Results

Now available at: <https://standards.nerc.net/Ballots.aspx>

### **Interpretation of IRO-010-1 for the Western Electricity Coordinating Council (WECC) Reliability Coordination Subcommittee (Project 2009-11)**

The ballot pool approved the standards revisions. The revised standards will be submitted to the NERC Board of Trustees for adoption.

The recirculation ballot for an interpretation of IRO-010-1 — Reliability Coordinator Data Specification and Collection, Requirements R1.2 and R3, for the WECC Reliability Coordination Subcommittee ended June 5, 2009. The final ballot results are shown below. The [Ballot Results](#) Web page provides a link to the detailed results.

Quorum:	90.45%
Approval:	85.76%

### **Ballot Criteria**

Approval requires both:

- A quorum, which is established by at least 75% of the members of the ballot pool for submitting either an affirmative vote, a negative vote, or an abstention; and
- A two-thirds majority of the weighted segment votes cast must be affirmative. The number of votes cast is the sum of affirmative and negative votes, excluding abstentions and nonresponses.

### **Project Background**

The WECC Reliability Coordination Subcommittee is seeking clarification on 1) the type of data to be supplied to the Reliability Coordinator, 2) which entities are ultimately responsible for ensuring data are provided, and 3) what actions are expected of the Reliability Coordinator regarding a “mutually acceptable format.” The request and interpretation are posted on the project page:

<http://www.nerc.com/filez/standards/Project2009-11 Interpretation IRO-010-1 WECC RCS.html>

### **Standards Development Process**

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
