

Standards Announcement

Project INT-2011-01 Interpretation of MOD-028-1 for FPL

Recirculation Ballot Results

[Now Available](#)

A recirculation ballot of MOD-028-2 Area Interchange Methodology and its implementation plan concluded on December 22, 2011. The standard was approved by the ballot pool. Voting statistics are listed below, and the [Ballot Results](#) webpage provides a link to the detailed initial ballot results.

Initial Ballot Results

Quorum: 90.10%

Approval: 92.49%

Next Steps

The standard and associated implementation plan will be presented to the NERC Board of Trustees for action, and if adopted, filed with regulatory authorities.

Background

In May 2011, FPL requested an interpretation of MOD-028-1, Requirement R3.1. The request asked for clarification of the timing and frequency of TTC calculations needed for ATC calculations. At its July 2011 meeting the Standards Committee approved (with FPL's consent) addressing FPL's request for interpretation through a rapid revision to the MOD-028-1 standard. The interpretation drafting team was appointed as the standard drafting team and directed to submit both a SAR and proposed revisions to MOD-028-1, addressing the issues raised in the request for interpretation. Because the revisions are narrowly focused on addressing the clarification requested by FPL, the Standards Committee approved waiving the initial 30-day formal comment period and directed that the SAR and proposed revisions to the standard be posted for a 45-day parallel comment period and ballot, which ended on November 16, 2011.

Standards Development Process

The [Standard Processes Manual](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate. For more information or assistance, please contact Monica Benson at monica.benson@nerc.net.
