## Project 2016-02 Modifications to CIP Standards Drafting Team Conference Call

March 21, 2019

### Administrative

#### 1. Review NERC Antitrust Compliance Guidelines and Public Announcement<sup>1</sup>

Jordan Mallory reminded the group of the Antitrust Compliance Guidelines and Public Announcement.

#### 2. Roll Call

Jordan Mallory Completed roll call.

#### 3. Introductions/Chair's remarks

Matt Hyatt thanked everyone for being on the phone and reminded observers that they are encouraged to be engaged with discussions and drafting.

#### 4. Review meeting agenda and objectives

### Agenda Items

#### 1. Outstanding Action Items – Review (Jordan Mallory)

Jordan Reviewed the outstanding action items. The CIP-003 SDT review has been extended for leadership to complete their review prior to sending to the team.

#### 2. CIP-005 Requirement R1 Ad Hoc Group – Working Session (Matt Hyatt)

- a. Do you agree with moving away from topology language within the requirements; allowing other types of security mechanisms to be allowed?

Jay Cribb provided an overview of the CIP-005 Requirement R1 Reduced Topology Approach document. Discussion was held around the newly proposed “Network Reachability” term and that in the virtualization world, network may be better replaced with device or system. There was a good amount of time spent on this discussion and the team decided to take a step back see if everyone agrees with the overall concept before tackling what the term should be.

Then discussion started around the term Reachability and if this word needs to be updated. The term access was suggested, but there needs to be a difference between the word reachability and accessibility. The team will continue to think on this before our next CIP meeting.

---

<sup>1</sup> See page 5.

Following the discussion of Network Reachability, it was asked if the term “routable” is the correct word to use in the ERC definition. The team will continue discussion around this definition at a later date.

The team reviewed the proposed CIP-005 R1 modification. It was agreed that the requirement is in a place to develop our hypothetical Pinecone Power entity and put it to the test. A small ad hoc group (Jake Brown, Jay Cribb, Matt Hyatt, Robert Garcia, and John Helmen) was formed to develop Pinecone Power and address the items below.

- What type of utility (big (high/med.), little (lows) or both?)
- This will be used as an example to use against the CIP-005 R1 example.
- Need a sample architecture
- Dual centers?
- Super ESP
- Data diode
- Zero trust (extreme eg)
- Containers
- NERC Registration/Applicability (TOs/TOPs)

### 3. Updates

Jordan provided update for each item below.

a. Case for Change White Paper – Update (Tasha Ward/Matt Hyatt)

The CIP SDT will continue to firm up the Case for Change White Paper at its March 26-28, 2019 SDT in-person meeting. Tasha will clean the document up prior to the start of next weeks meeting.

b. Elevator Speech – Review/Discuss (Jordan Mallory)

The team received a couple of modified elevator speeches from observers and will review during our March 26 in-person SDTs meeting.

c. V5TAG White Paper – Reminder (Jordan Mallory)

The CIP SDT is currently reviewing the V5TAG white paper and any edits are due by March 26, 2019.

d. Informal Virtualization Comment Response Document – Touch Base (Jordan Mallory)

An email was sent to SDT members to vote on the “What We Heard” White Paper. Votes are due by March 26, 2019.

e. CIP-002/CIP-003 – Update (Jordan Mallory)

CIP-002 is a work in progress with the FAC SOL team re regarding the Criterion 2.6 and 2.9. There is a meeting on Friday, March 22 to determine a path forward and then to receive feedback from both SDTs.

CIP-003 is being reviewed by CIP leadership and will be sent to the CIP SDT for review soon.

f. CIP SharePoint – Update (Jordan Mallory)

The CIP SharePoint site is still being cleaned up and active observers will receive access within the next couple of weeks.

### **NERC Antitrust Guidelines**

It is NERC's policy and practice to obey the antitrust laws and to avoid all conduct that unreasonably restrains competition. This policy requires the avoidance of any conduct that violates, or that might appear to violate, the antitrust laws. Among other things, the antitrust laws forbid any agreement between or among competitors regarding prices, availability of service, product design, terms of sale, division of markets, allocation of customers or any other activity that unreasonably restrains competition. It is the responsibility of every NERC participant and employee who may in any way affect NERC's compliance with the antitrust laws to carry out this commitment.

### **Disclaimer**

Participants are reminded that this meeting is public. Notice of the meeting was posted on the NERC website and widely distributed. The notice included the number for dial-in participation. Participants should keep in mind that the audience may include members of the press and representatives of various governmental authorities, in addition to the expected participation by industry stakeholders.
