NERC is seeking individuals from the United States and Canada who possess knowledge and expertise in one or more of the following areas:

- Protection system settings and performance;
- Transmission Planning stability experience in synchronous and inverter-based resource performance during voltage and frequency excursions;
- Inverter-based resources experience, including performance characteristics, inverter manufacturers, control systems with protective functions, and experience in dynamic simulations for inverter-based generation.

NERC is also seeking individuals who have facilitation skills or legal/technical writing backgrounds as well as those who have experience with developing standards inside or outside the NERC development process (e.g., IEEE, NAESB, ANSI, etc.). Such experience should be highlighted in the information submitted, if applicable.

Previous drafting or periodic review team experience is beneficial, but not required. See the [project page](#) and unofficial nomination form for additional information.

Next Steps

The Standards Committee is expected to appoint members to the team in Q1 2019. Nominees will be notified shortly after they have been selected.
