Background

The revisions to the PRC-006-NPCC-1 Automatic Underfrequency Load Shedding have been developed to address the following concerns.

1. To determine if the applicability of the standard needs to be revised in accordance with Project 2014-01 Dispersed Generation Resources.
2. To determine if the performance requirements as contained in the criteria of NPCC Directory#12 Sections 5.1.1 and 5.1.2 should be explicitly included in the requirements of the Regional Standard and potential retirement of Directory 12 Automatic Underfrequency Load Shedding Program.
4. Review and revise Table 4 in Attachment C in accordance with the 2013 NPCC UFLS Adequacy Assessment. Additionally, the applicability of Requirements R4 and R5 will be reviewed to consider that Hydro Quebec is not part of the Eastern Interconnection.

R3 will be enforceable on the first day of the first calendar quarter 12 months following the applicable governmental and regulatory approvals.
