

Standards Announcement

Project 2009-02 Real-time Reliability Monitoring and Analysis Capabilities

Solicitation for Drafting Team Nominations

[Now Available](#)

Nominations are being sought for Project 2009-02 Real-time Reliability Monitoring and Analysis Capabilities drafting team (SDT) members through **8 p.m. Eastern, Friday, March 6, 2015**.

Original members of the Project 2009-02 SDT who desire to continue to participate are also requested to submit a nomination.

Previous drafting or review team experience is beneficial but not required. A brief description of the desired qualifications, expected commitment, and other pertinent information is included below. Detailed information is included on the unofficial Word version of the nomination form which can be found on the [project page](#). Use the [electronic form](#) to submit nomination(s).

Project 2009-02 – Real-time Reliability Monitoring and Analysis Capabilities

Project 2009-02 is included in the 2015-2017 Reliability Standards Development Plan (RSDP) approved by the NERC Board of Trustees (Board) on November 13, 2014. Formal development of this project was paused in 2011 and will resume to address outstanding Federal Energy Regulatory Commission (FERC) directives and issues that were not consolidated into Project 2014-03 TOP/IRO Revisions.

Project 2009-02 was initiated in response to work done by the NERC Operating Committee's Real-time Tools Best Practices Task Force (RTBPTF). From 2009 to 2011, a Standard Authorization Request (SAR) SDT developed a SAR and technical white paper to establish requirements for the "functionality, performance, and maintenance of Real-time Monitoring and Analysis Capabilities."^[1] Some members of the original SDT have indicated that they are no longer available to continue participating in Project 2009-02. Nominations of subject matter experts (SMEs) are being sought to replace SDT members that are no longer participating, and to provide diverse technical experience, industry leadership, and regional and entity representation.

^[1] SAR is available at the following:
http://www.nerc.com/pa/Stand/Project%20200902%20Realtime%20Reliability%20Monitoring%20and/2009-32_RTSDT_Third_Posting_SAR_Clean_2010April1.pdf

The SDT will consider the FERC directives and guidance, stakeholder input, and relevant industry reports for the purpose of revising the SAR for Standards Committee action and revising the white paper that was in development in 2011.

Next Steps

The Standards Committee is expected to begin appointing members to the SDT in April 2015. Nominees will be notified shortly after they have been appointed to the drafting team.

For information on the **Standards Development Process**, refer to the [Standard Processes Manual](#).
