Outreach Slides

Project 2016-02 Modification to CIP Standards

Project 2016-02 SDT
March 2022

RELIABILITY | RESILIENCE | SECURITY

- **NERC Antitrust Guidelines**

- It is NERC's policy and practice to obey the antitrust laws and to avoid all conduct that unreasonably restrains competition. This policy requires the avoidance of any conduct that violates, or that might appear to violate, the antitrust laws. Among other things, the antitrust laws forbid any agreement between or among competitors regarding prices, availability of service, product design, terms of sale, division of markets, allocation of customers or any other activity that unreasonably restrains competition.

- **Notice of Open Meeting**

- Participants are reminded that this webinar is public. The access number was widely distributed. Speakers on the call should keep in mind that the listening audience may include members of the press and representatives of various governmental authorities, in addition to the expected participation by industry stakeholders.

	Name	Entity
Co-chair	Jay Cribb	Southern Company
Co-chair	Matthew Hyatt	Georgia System Operations Corporation
Members	Jake Brown	ERCOT
	Norman Dang	Independent Electricity Systems Operator of Ontario
	Robert Garcia	SPP, Inc.
	Scott Klauminzer	Tacoma Public Utilities
	Sharon Koller	ATC, LLC
	Heather Morgan	EDP Renewables
	Mark Riley	Associated Electric Cooperative, Inc.

- 2016-02 Activity
 - Industry Feedback addressed in Draft 3
 - Draft 3 is currently posted through April 11th
 - Full webinar on the posting (March 14) and recording has been posted
- Draft 3 Modifications (Highlights)
 - SCI shift from describing Hypervisors/Storage to describing situations where multiple impact ratings exist
 - ESP modified to allow Zero Trust, Super ESP, and preserve backward compatibility
 - CIP-010 shift to security objective language

- Informal Discussion using Slido Q&A features
- Reminders
 - Some questions may require future team consideration
 - Team will address as many questions as possible
 - Webinar and chat comments are not a part of the official project record
 - Questions regarding compliance with existing Reliability Standards should be directed to ERO Enterprise compliance staff, not the Standard Drafting Team.
