Project 2006-06: Reliability Coordination

The Reliability Coordination Standard Drafting Team is seeking comments on a Supplemental SAR to expand the scope of work under its project to address some directives from Order 693 that are associated with IRO-003-2 — Reliability Coordination — Wide Area View **until 8 p.m. EDT on September 3, 2010.**

Instructions

Please use this [electronic form](#) to submit comments. If you experience any difficulties in using the electronic form, please contact Courtney.camburn@nerc.net. An off-line, unofficial copy of the comment form is posted on the project page: http://www.nerc.com/filez/standards/Reliability_Coordination_Project_2006-6.html

Next Steps

The drafting team will post responses to comments received during this period and if stakeholders support the expansion of this project, will use the comments received to propose specific revisions to IRO-003-2.

Project Background

The Reliability Coordination Standards Drafting Team was tasked with 1) ensuring that the reliability-related requirements applicable to the Reliability Coordinator are clear, measurable, unique, and enforceable; 2) ensuring that this set of requirements is sufficient to maintain reliability of the Bulk Electric System; and 3) revising the group of standards based on FERC Order 693. During the course of this project, the Reliability Coordination Standards Drafting Team incorporated changes due to the work of the IROL Standards Drafting Team, and two standards from the original Standards Authorization Request (PER-004 and PRC-001) were moved to other projects due to scope overlap. The expansion of this project to include revisions to IRO-003-2 would address directives from Order 693 that have not been assigned to any active drafting team.

Applicability in IRO-003-2

Reliability Coordinator

Standards Development Process

The [Reliability Standards Development Procedure](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
