Comment Period for Errata in Approved Reliability Standards Open for 30-day Comment Period

A set of errata in approved reliability standards is posted for a 30-day comment period from July 2–31, 2008.

There are several approved NERC Reliability Standards that contain errors that, if corrected, do not change the scope or intent of the associated approved standard and do not have a material impact on the end users of the standard. These errors identify discrepancies identified after the standards were submitted for regulatory approval. The errors have been preliminarily classified as errata. NERC is posting the errata for a 30-day comment period to provide stakeholders an opportunity to identify any material impacts associated with the errata that staff may have missed.

The reliability standards affected are:

- BAL-001-0a — Real Power Balancing Control Performance
- BAL-003-0a — Frequency Response and Bias
- BAL-005-0a — Automatic Generation Control
- BAL-006-1 — Inadvertent Interchange
- COM-001-1 — Telecommunications
- EOP-002-2 — Capacity and Energy Emergencies
- EOP-004-1 — Disturbance Reporting
- FAC-010-1, FAC-011-1, FAC-014-1 — Implementation Plan
- IRO-001-1 — Reliability Coordination — Responsibilities and Authorities
- MOD-006-0 — Procedures for Use of CBM Values
- MOD-015-0 — Development of Interconnection-Specific Dynamic System Models
- MOD-016-1 — Documentation of Data Reporting Requirements for Actual and Forecast Demands, Net Energy For Load, and Controllable Demand Side Management
- MOD-017-0 — Aggregated Actual and Forecast Demands and Net Energy For Load
- MOD-019-0 — Forecasts of Interruptible Demands and DCLM
- PRC-016-0 — System Protection System Misoperations
- TOP-005-1 — Operational Reliability Information
- TPL-001-0 — System Performance Under Normal Conditions
- VAR-002-1a — Generator Operation for Maintaining Network Voltage Schedules

To aid in your review, there is a summary document of the changes as well as a clean and a red-line version (showing the errata in the last approved version of the standard) of each of the affected standards posted at the following site:

<http://www.nerc.com/~filez/standards/Standards%20Errata.html>

Please use only the [electronic comment form](#) to submit comments by 8 p.m. (EDT) on **July 31, 2008**. If you

experience any difficulties in using the electronic form, please contact Barbara Bogenrief at 609-452-8060.

If you need an off-line, unofficial copy of the questions in the comment form, there is a copy of the comment form posted at site noted above.

If stakeholders do not identify material impacts by these changes, the errata will be presented to the Standards Committee for authorization to move forward for NERC Board of Trustees approval.

Standards Development Process

The [Reliability Standards Development Procedure Manual](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate.
